Key Ingredients

Melatonin: This hormone is produced naturally in the brain, and helps usher the onset of the body's natural circadian sleep cycle.*

GABA (Gamma-aminobutyric acid): This neurotransmitter inhibits nerve activity in the brain, allowing it to slowly relax, and supports its normal sleep cycle.*

NAC (N-acetylcysteine): This amino acid decreases levels of glutamate, another amino acid that encourages alertness in the brain. NAC also stimulates the production of glutathione, a powerful antioxidant enzyme.*

Vitamins B2 & B6: These important vitamins help support normal neurotransmitter and hormone functions (including the production and conversion of melatonin).*
